Product Description

LF-GSD050YG series is a 50W constant current LED driver with DALI and Push dimming functions. The input voltage limit is 198-264VAC. Its output current can be adjusted from 900mA to 1200mA via the DIP switch, in steps of 50mA.

Features

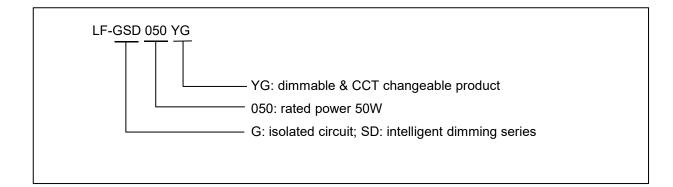

- IP20
- Suitable for Class II light fixtures
- Constant current output. The output current can be adjusted via the DIP switch
- Built-in active power factor correction function
- Standby power consumption: <0.5W
- DALI dimming (The logarithmic dimming curve or the linear dimming curve can be selected via the software)
- Push dimming
- Adjustable CCT range: 2000K-7000K
- 5-year warranty (Please refer to the warranty condition.)

Applications

- Indoor office lighting
- Decorative lighting
- Commercial lighting
- Residential lighting
- Plant lighting

Product Naming

Electrical Characteristics

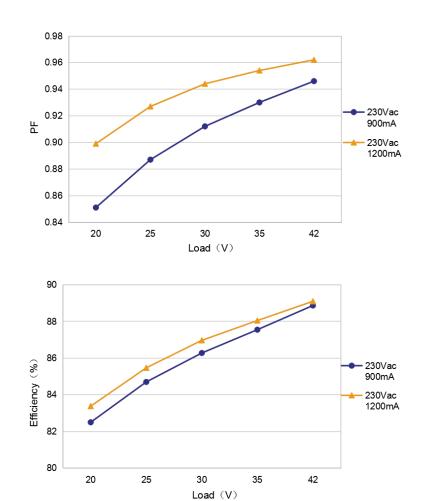

Model		LF-GSD050YG						
Output Voltage		20-42V						
Output	Output Current	The output current can be adjusted via the DIP switch.						
				Please refe	to the DIP	switch table		
	•	900mA	950mA	1000mA	1050mA	1100mA	1150mA	1200mA
	Flicker Index	IEC-Pst≤1, CIE SVM≤0.9, Modulation Depth≤1% (Meet with flicker free standard: IEEE Std 1789-2015)						
	Ripple Current	<5% (rated current) <3% (rated current)						
	Current Tolerance	±3.5%						
	Temperature Drift	±5%						
	Start-up Time	<1S @23	<1S @230Vac					
	Input Voltage	220-240Vac (voltage limit: 198-264Vac)						
	DC Input Voltage	310-340Vdc (voltage limit: 280-374Vdc)						
	Input Frequency	47Hz-63Hz						
	Input Current	0.35A Max.						
	Power Factor	≥0.92 ≥0.93 ≥0.95						
	THD	≤15%						
Input	Efficiency	≥88% ≥88.5%						
	Inrush Current	≤60A & 100uS @230Vac						
	Load Quantity of What a Circuit Breaker can Support	Circuit Bro	eaker Mod	el B1	0 0	C10	B16	C16
		Quantity ((pcs)	20	D	20	32	32
	Leakage Current	≤0.7mA						
	Standby Power Consumption	≤0.5W (when the DALI signal is off)						
Protection	Open Circuit Protection	<59V Hiccup mode (auto-recovery)						
Characteristics	Short Circuit Protection							
	Operating Temperature	-30℃~+45℃						
Environment Descriptions	Operating Humidity	20-90%RH (no condensation)						
	Storage Temperature/	-30℃~+ 80℃ (six months under class I environment);						
	Humidity Atmospheric	10-90%RH (no condensation)						
	Pressure	86KPa~106KPa

	 It is recommended that customer should install overvoltage and undervoltage prote devices and surge protection devices in the power supply circuits of the light fixtur ensure safety before connecting to electricity. 		
Remarks	2. As an accessory, the LED driver is not the only factor determining the EMC performance of the LED light fixture. The structure and the wiring of the light fixture are also relevant. Thus it's strongly recommended the LED light fixture manufacturer should re-confirm the EMC of the whole LED light fixture.		
	3. The test condi- the inrush curr	tions of the circuit breaker configuration quantity are the same as that of rent test.	
	ambient tempe	ise stated, the parameters above are test results under the conditions of erature of 25° C, humidity of 50%, DALI signal input, 100% load, maximum, CCT of 3115K and input voltage of 230Vac.

Instructions of Dimming Operation

Terminals

INPUT

OUTPUT

AC-L	AC live wire input
AC-N	AC neutral wire input
PUSH	PUSH dimming signal input
DA1	DA1 dimming signal input
DA2	DA2 dimming signal input

WW+	Positive electrode output of warm white light
WW-	Negative electrode output of warm white light
CW+	Positive electrode output of cool white light
CW-	Negative electrode output of cool white light

DIP Switch Table

I rated (CC)	1	2	3	4
1200mA	OFF	OFF	OFF	OFF
1150mA	OFF	OFF	OFF	ON
1100mA	OFF	OFF	ON	OFF
1050mA	OFF	OFF	ON	ON
1000mA	OFF	ON	OFF	OFF
950mA	OFF	ON	OFF	ON
900mA	OFF	ON	ON	OFF

Remark: Except the settings mentioned in the table above, other DIP switch settings are default to be the maximum current 1200mA.

Wiring diagram for dimming & CCT changing in the push dimming mode

 AC-L
AC-N
PUSH
DA1
DA2

In the push dimming mode, double click (Each click is not less than 100ms. The interval of two clicks is not more than 200ms.) the push button and the dimming mode or the CCT changing mode will be switched to each other.

The push dimming function has a memory function in case of power failure. Connect to the power supply again and the light will recover to the status before the power failure.

Push dimming operations

Fud 莱福德

Operation	Operation Time	Function
Instant Push	0.1 - 0.5 sec	LED Light on / off
Long Push	0.6 - 4.6 sec	Dim up / down
Reset Push	> 9 sec	Reset to the 50% luminance

The push operation won't cause any variation if it's less than 0.1 sec.

- The minimum dimming depth of push dimming is 1% (lout).
- When entering to the push dimming mode for the first time, it's default to be in the dimming mode. (100% luminance; 50% luminance for each of the warm light output and cool light output)
- For the first long press on the push button, the CCT remains the same and the luminance dims.
- The current dimming direction (dimming up or down) is opposite to the previous one.

CCT changing in the push dimming mode

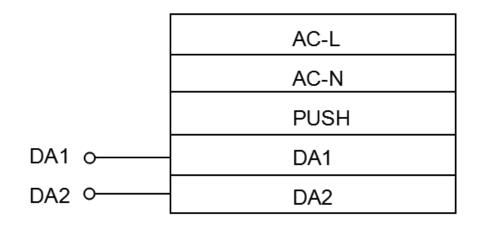

Operation	Operation Time	Function
Instant Push	0.1 - 0.5 sec	LED Light on / off
Long Push	0.6 - 4.6 sec	CCT changing
Reset Push	> 9 sec	Reset to the 50% luminance for each of the warm-light output and cool-light output

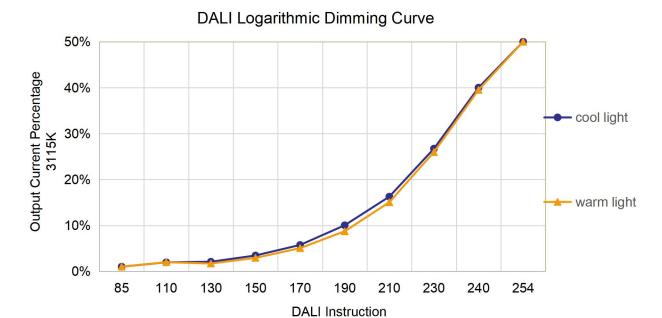

The push operation won't cause any variation if it's less than 0.1 sec.

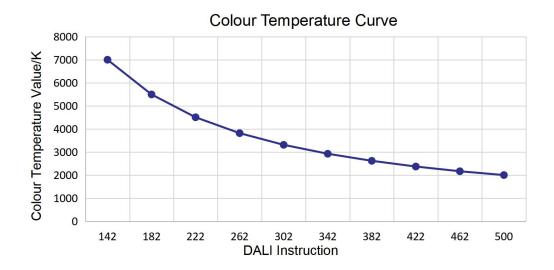

- The minimum CCT is warm light and the maximum is cool light.
- When entering to the CCT changing mode of the push dimming for the first time, it's default to be 50% luminance for each of the warm-light output and cool-light output.
- For the first long press on the push button, the luminance remains the same and the CCT begins to be cooler.
- The current direction (becoming warmer or cooler) is opposite to the previous one.

DALI dimming operations

- Factory default is 100% luminance with 50% luminance of each of the warm-light output and cool-light output.
- Connect the DALI signal to the DA1 and DA2 terminals.
- DALI protocol includes 16 groups and 64 IP addresses.
- The minimum dimming depth of the DALI dimming is 5% (lout).

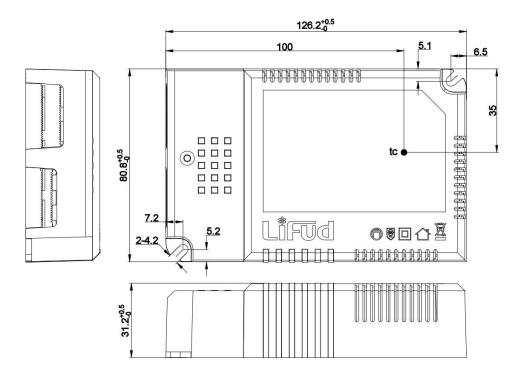

Instructions of switching dimming modes

- For the first time being powered on, it's default to be in the DALI dimming mode at 100% luminance with 50% luminance of each of the warm-light output and cool-light output.
- Switching between the DALI dimming and the push dimming modes:
 - Switch to the push dimming mode: Long press the push button for over 0.6 sec and then it's switched to the push dimming mode. The current output status is the same as the previous one.
 - Switch to the DALI dimming mode: Receiving any DALI instruction will switch to the DALI dimming mode. If it's a non-dimming instruction, the output status remains the same. If it's a dimming instruction, the light will be dimmed as the instruction tells.

Model	LF-GSD050YG
Packaging dimensions	385*285*210 mm (L*W*H)
Quantities	8 pcs/layer; 6 layers/ctn; 48 pcs/ctn
Weights	0.2192 kg/pc; 11.7 kg/ctn

Transportation & Storage

- Transportation
 - Suitable transportation means: vehicles, boats and aircraft.
 - During transportation, there should be awnings for rain protection and sun protection. Civilized loading and unloading are required. There should be no severe vibration or impact.
- Storage
 - Storage in accordance with the provisions of the Class I environment. For products which have been stored for more than six months, they mustn't be used until they pass the re-inspection.

Attention

- Please use this product according to its specifications otherwise there may be malfunction.
- Use light fixtures that have not been certified or are not compatible with the LED drivers may cause fire or other hazards.
- Man-made damage, any use beyond the specification and non-original-factory modification are not covered by warranty.
